

Title: netflix_tv_shows_detailed_up_to_2025.csv

Size: 16000 rows × 16 columns

Source: The dataset was downloaded from [Kaggle](#) and included two datasets for TV Shows and Movies available on Netflix, but the data used in this project is the TV Show data only.

Quality: The dataset contained a significant number of missing values and some duplicate values, making it suitable for performing Data Cleansing and Transformation.

Overview:

```
df.info()
```

[4]

Description:

This dataset contains information on Netflix TV shows, sourced from TMDb (The Movie Database). It includes details such as titles, genres, release dates, ratings, descriptions, and other relevant metadata. The dataset has been curated to provide a comprehensive overview of Netflix's content library.

Column Name	Description	Datatype
show_id	Identifier for a show	Integer
type	Type of title, which could be 'TV Show' or 'Movie'	String
title	Name of the show	String
director	Name(s) of the show director(s)	String
cast	Names of the actors on the show	String
country	Country where the show was made	String
date_added	The date at which the show was added to the Netflix library	String
release_year	The year the show was released	Integer
rating	The rating of the show according to TMDb	Float
duration	The number of seasons in the show	String
genres	The genres the show is listed under	String
language	The original language the show was released in	String
description	A summary of the show	String

popularity	Popularity score assigned by TMDb	Float
vote_count	The number of user votes	Integer
vote_average	The average user rating	Float
